TO: Minerals File

FROM: Lynn Kunzler, Senior Reclamation Biologist 

RE: Site Inspection, Zachery Jensen, J&J Quarries #1, S/039/017, Sanpete County, Utah

Dates of Inspection: March 31, 2004
Conditions: Fair, breezy
Participants: Lynn Kunzler, DOGM

Purpose of Inspection: To inspect the adequacy of reclamation.

Observations:

The Division was notified via phone call from Marilyn Jensen on March 29, 2004, that this operation has been reclaimed. She was concerned that we inspect this site in the near future because there is a possibility that Danny Bown may pursue obtaining a lease for this area and re-open the quarry.

Regrading of this site has returned the disturbed area to near original contour. Waste/overburden piles have been eliminated by using this material to fill in pits. All pits have been adequately filled. Stockpiled topsoil has been re-distributed over the regraded areas. There were a few areas where compaction may be a problem, but overall, the reclamation work completed appears to be satisfactory. The Division will need to wait for vegetation establishment before this permit can be closed.

Several photos were taken to document site conditions.
